

# Together Against Sizewell C

We are a campaign group opposed to the building of two more nuclear reactors with all the accompanying paraphernalia on the fragile Suffolk Heritage Coast.

**We submit that the Sizewell site is not suitable because of its very vulnerable, remote, coastal, rural position.**

**We do not want SZC** with its traffic, roads, accommodation blocks, Park and Ride etc. all to the detriment of East Suffolk.

**This should not happen in anyone's backyard.**

We are concerned that the proposed massive development threatens our special area, our way of life and the mosaic of habitats which support such a diversity of wildlife.

The potential site for SZC is constricted by marsh and dunes and is **far too small** to contain two French EPR nuclear reactors and all other ancillary buildings.

The site is an **AONB** (Area of Outstanding Natural Beauty).

It will cause loss of part of a **SSSI**

(Site of Special Scientific Interest)

and threaten an **SPA** (Special protection Area).

It is also situated on the **Suffolk Heritage Coast** causing loss of the Heritage Coast Path from Sizewell to

**Minsmere.**

The quality of life for **residents and visitors** will be reduced and property values may fall, as will revenue from the tourist trade. There will be increased traffic, air, noise and light pollution, continuously for at least **12 years!**

If Sizewell C goes ahead there will be **three** power plants producing **nuclear waste** which will have to be **stored on site** for over a century as there is no long term disposal facility anywhere in the country.

The Suffolk Coast is prone to **flooding** and **erosion** and not at all suitable for **two more nuclear reactors** or the **high level radioactive waste** which they produce.

Check out the Environment Agency web site for flooding map of Sizewell IP16 4UR  
[www.environment-agency.gov.uk](http://www.environment-agency.gov.uk)

The French EPR reactor planned for Sizewell has **not** been tried and tested, as **not one** is yet completed.

All of the above when there is **no proven need** and when many other forms of technology are available which are far **less polluting** and **less environmentally damaging**.

## SIZEWELL C NOT FOR ME

*If you wish to support us and be kept up to date with our events and meetings etc. send your e-mail address, phone number or postal address to:-*
